World leaders in training tomorrow's Marine Surveyors

www.iims.org.uk

Your career as a Marine Surveyor

Marine surveying in all its fields has always provided an exciting career for marine professionals. Coming ashore after years at sea, Master Mariners and Chief Engineers have always enjoyed the challenge of surveying vessels and cargoes that they had dealt with whilst sailing the world.

The occupation now stands at a crossroads. Fewer Master Mariners and Chief Engineers are taking up a career in marine surveying and so the maritime world needs newly trained and more technologically aware people to take up the challenge. Whether your passion is small craft, yachts, big ships, cargoes or even offshore oil rigs, they all need surveying.

The world of marine surveying is changing and the opportunities now available offer all interested people the chance to enter a career with real purpose.

The institute is the world leader in marine surveying. Only by training with the Institute can you grasp the opportunity to train for a career that will change your life forever.

For more information about becoming a member of the institute, the comprehensive range of courses available and how to apply, contact us now on +44 (0)23 9258 8000

reasons why you should learn how to be a marine surveyor through the IIMS
